

The Perfect Kitchen Toaster Is a Real Challenge

High volume kitchens struggle with special orders.
If you slow down the toaster, production suffers. You lose money.
If you speed up the toaster, you waste bread. You lose money.
Your reputation is on the line when customers aren't satisfied.

Frustration

You end up with frustrated workers because they can't meet the demands.

Your customers aren't satisfied because they aren't getting what they want.

You've wasted time and money because you're wasting bread trying to get it right.

But There Is a Solution

The Advantage Kitchenware Toaster

Has a proprietary technology that allows special orders.

It does not affect other slices, thereby reducing waste.

No confusing dials to fiddle with and is very precise.

Three buttons for each order takes the guess work out.

Easily select light, medium, or dark for the perfect toast.

It Can Handle Large Orders of Toast

The Advantage Kitchen Toaster can toast 500 slices per hour.

It can also toast thick slices of bread and bagels.

You control how each order is toasted at the press of a button.

The End Result

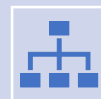

You maintain kitchen productivity because you can meet the demands.

Your staff serves with confidence because they have better equipment.

You save time and money because you're not wasting bread.

You maintain customer retention because they are satisfied.

Your Competitive Advantage

- Happy customers will bring their friends and that will increase your bottom line.
- Your staff will serve with confidence and that will bolster your reputation.
- Everyone is happy and satisfied and that will improve kitchen productivity.
